Analisa Harga Satuan Pekerjaan Dinding Partisi (Rp.) (Rp.) A smart home is a home in which a number of devices and appliances are connected to one another so as to provide convenience and easy living to people. In the related art, users are provided with various functions to improve convenience in use of a smart home. For example, a doorbell is turned on, and an actual doorbell sound is generated

---

according to a user operation, and a door lock is activated or deactivated according to the user operation, so that the user can conveniently lock and unlock the door. In the related art, such a smart home may further provide a user with a function to present data about domestic products to the user in different manners. For example, in the case where a washing machine is provided, the washing machine may present data about a washing cycle to the user in the form of voice so as to guide the user on how to wash the laundry or the like. In order to present data in a manner as stated above, the washing machine needs to recognize a user's voice. That is, the washing machine needs to analyze and recognize a user's voice. However, in the related art, there is no technology for recognizing a user's voice. Hair loss can be devastating to men and
