ObjectARX (C++ for AutoCAD) The ObjectARX (Object-Oriented ARX) functionality enables the rapid development of AutoCAD-based applications. These use AutoCAD's object database, a technology based on a .NET framework (ASF) that allows objects to be added, organized and removed to a repository. The ObjectARX framework is supported for Windows 95, 2000 and XP, as well as Windows Vista, Windows 7 and Windows 8. ObjectARX is supported in AutoCAD R13 and above, and is available as a standalone application or via the AutoCAD online service. Insulin receptors are transmembrane proteins that mediate the biological actions of insulin. The expression of insulin receptor genes (IR-A and IR-B) was examined in rat islet beta cells, using reverse transcription polymerase chain reaction (RT-PCR). IR-A mRNA was detected in islet cell suspensions but not in islet cell homogenates. RT-PCR analysis of insulin receptor mRNA in purified beta cells showed a single band of expected size for IR-A and IR-B mRNA. Southern blot analysis showed IR-A gene to be a single copy gene. IR-A mRNA was also detectable in the brain, spleen, kidney and pituitary. These data suggest that insulin receptor genes are differentially expressed in the islet beta cells and other tissues and may play a role in the regulation of glucose metabolism.Ahead of the release of her official debut album on June 16, singer-songwriter Josephine Decker has dropped the music video for her newly released single "Sitting in Limbo," which could prove to be a hint of what fans can expect when her debut album—a long-overdue follow-up to her 2012 EP Guppy—drops this fall. Decker teamed up with filmmaker Dylan Gladden to give fans a little sneak peek into the album, which will be available on iTunes, Spotify, and all other major music platforms. Directed by Gladden, the video is said to be a collage of videos from previous eras, featuring scenes from the 21st century. "This is a song that I've been playing live for a long time," Decker says of the song in an interview with Billboard. "It feels so nostalgic and old-fashioned, and yet it's also timeless. Dylan came on board and we came up with a whole new treatment for the video, which really gives a nod to the old and the new all at once." For the video, Decker collaborated with music producer and DJ Chris Coco, who created music for the film "Sliding Doors."
