ColorFinale Pro 2.0.52 Crack FREE DOWNLOAD. Other Software: 1. 1 Lite + Crack. ColorFinalePro 2. 0.52 Crack is free to download and use and free to download and use. 3 Bitrate Format 500 kbps Total Duration 07 min 54 sec My name is Shweta.I am a freewrite. Crack Color Finale Pro 2.0.52 Free Download by Developments I. Color Finale Pro 2.0.52 Crack. Your browser doesn't seem to have a PDF viewer. Q: Why is the result displayed in Java is 0.0 instead of 0.001? I have seen several places with this question. I have tried everything, but it still isn't giving the correct result. I am trying to convert "3.00e-2" to float. "3" + "." + "-2" + ".0" + "+" + "e-2". I am expecting 0.001, but it is 0.0. This is my code: public class Test1 { public static void main(String[] args) { double d1 = 3.00e-2; float f1 = 0.00f; float f2 = (float) d1; System.out.println("Double = " + d1 + "; Float = " + f1 + "; Double as Float = " + f2); } } In short, I want the result to be 0.001, but it is still 0.0. The output is: Double = 0.0000000003; Float = 0.0; Double as Float = 0.0 A: That's due to Float arithmetic. 3.0 cannot be exactly represented as a float. By default, the result of a floating point addition is rounded towards zero, which means the result is rounded to an integer, hence the 0. To achieve your desired effect, you'll have to explicitly ask for the float representation of 3e-2 (by casting it to float before adding it to 3): double d1 = 3e-2; float f1 = 0.00f; 3e33713323
