Clearcase For Eclipse Free

This plugin provides a comprehensive integration of KeyMacro from IBM with the ClearCase UCM repository and the Eclipse IDE. You can work with KeyMacro as you would with any other ClearCase view, resource, and change set. The following features are supported: - Execute KeyMacro commands from within the ClearCase repository. - View KeyMacro scripts and their results in the ClearCase view - Edit the scripts directly, or use existing and create new scripts. - Import scripts into your ClearCase view and resources - Create, run, and view scripts from within the Eclipse IDE - Validate and test scripts from within the Eclipse IDE - Export scripts to a cvs file, and then import the file into your view. INFOS - KeyMacro should work from version 7.0 and up of the ClearCase client - You can choose between the ccmclient or the hccclient by using the 'client' checkbox

== Install from the Eclipse Marketplace ==> ==> If you do not have the clearcase client installed yet, you will find it in the following location: C:\Program Files\IBM\ClearCase Client 6.0.0.0\help\ ==>You should download the package for your OS version of the client if you use Windows. ===>You should download the package for your OS version of the client if you use Linux. ==> How do I install the plugin for ClearCase? ==> The simplest method is to install the plugin from the Eclipse Marketplace. ==> How do I uninstall the plugin for ClearCase? ==> The simplest method is to delete the plugin.xml file in the plugin folder. ==> How do I re-install the plugin? ==> You may need to re-register the plugin.xml file with the Eclipse update manager. ==> I am getting an error message when I try to run the plugin. ==> The easiest solution is 1d6a3396d6
