Jan 30, 2013 It will replace the trial-and-error approach to programming by. NC Templating is much closer to automated machining in Cimatron E11. . to design, to manufacturing. Deliver high-quality molds of any complexity and size in record time. Cimatron Mold Making Overview. REQUEST A FREE TRIAL . REQUEST A FREE TRIAL . Jan 30, 2013 It will replace the trial-and-error approach to programming by. NC Templating is much closer to automated machining in Cimatron E11. . to design, to manufacturing. Deliver high-quality molds of any complexity and size in record time. Cimatron Mold Making Overview. REQUEST A FREE TRIAL . E11 (with P25) E11 Cimatron is a parameter-driven method that combines a 3D Geometry Editor, a Part Preparation tool, a CNC Operation Planning Tool and a powerful simulation program. E11 Cimatron is the most advanced multi-process software available and is ideal for project-based fast prototyping in SMT and CNC operations. REQUEST A FREE TRIAL . E14 (with E11) Model-Based Operations. Cimatron E14 is an extension to the E11 Cimatron platform. The focus of E14 is on using a robust, detailed, parametric geometrical model of the part to achieve the highest levels of design productivity. Model based operations allows the use of the same geometrical model for rapid and repeatable machining, and allows the designer and engineer the opportunity to work together iteratively in a collaborative environment.
