The results obtained from different experiments indicate that the effect is related to the concentration of the steroid, to the time of incubation and to the presence of collagen. In the presence of serum the stimulating effect of 17 beta-estradiol is abolished. The effect of the hormone is also influenced by the hydrocortisone-sorbitol treatment of the cells. The mechanism by which the hormone acts is not yet known but it is assumed that a higher production of plasmin, whose role in the process of tumor cell growth is well documented, may be one of the mechanisms of the hormone.Read also: Read also: Read also: New Delhi: India has said Pakistan will not be allowed to destabilise Kashmir by using its territory to help the Jaish-e-Mohammad (JeM), a terror group that had been affiliated to the Pakistan-based terror outfit.New Delhi has decided to launch a diplomatic offensive on the issue of cross-border terrorism, but the situation on the ground in Kashmir is "complicated" and ca3fb1094
