I am using vue cli with webpack and I am trying to add a module for a shareable component. I am basing the module off of this example but I can't seem to get it to run. Things I have done: 1) Made a folder and called it shared in the src/modules directory. 2) Made a file called shared.js with this content: //This is where I'm using import Vue from 'vue' import Vue from 'vue' export default { components: { }, data() { return { } } } 3) Made a file called shared.vue, this is the component that I want to share This is shared I have run npm run dev and I am able to view the app as it should be, but when I run npm run dev:shared I get this error: Error: [vue-loader] Cannot resolve module '
