AirMech is an Action-RPG (RPG) set in an alternate future America following a global collapse of modern civilization. You are one of a few skilled survivors who are able to operate AirMechs and maintain them. **Story**The world of AirMech Wastelands is a wasteland. It's left behind by a war that killed most of the world's population. Your character is born in the wasteland and leaves home to search for supplies. In the space of a few years, they find a way to survive in this broken world by fighting against the Scavengers - a gang of bandits that rule the ruined landscape. Scavengers rule the ground and vie for power by capturing AirMechs and human survivors who try to salvage anything left in the country. But the scavengers are not the only threat in the Wastelands. There is a mysterious, emergent group of Force Engineers that have been stealing AirMech technology from the war zone and its structures for years. They are building unstoppable killing machines from the wreckage, and they want to use their new weapons to bring down the scavengers and the world's last remaining humans. You must lead the resistance against the scavengers and the force engineers in order to free the wasteland and rule the world. **Gameplay**AirMech Wastelands is an Action-RPG (RPG) that is similar to the classic BattleTech/MechWarrior series and the more recent titles, MechWarrior: Living Legends, MechWarrior Online, MechWarrior 5: Mercenaries, MechWarrior 6: Mercenaries, and MechWarrior Online. However, instead of controlling a WarSuit or more traditional infantry mech, you will control a unique, customizable, AirMech. Your AirMech plays similar to a jet fighter, with the ability to use high or low ground-attack style of weaponry, from cannons and laser weapons to railgun and missile pods. Your AirMech can be equipped with any weapon that it can carry and requires a combination of skill, luck, and raw piloting talent to be effective. The range of weapons available to you is limited, but if you find or can build a new rare weapon that was not available during the war, you can use that in combat to turn the tide in your favor. You will have the ability to design and level your AirMech from scratch, earning more power as you progress. Your Pilot is the core of your AirMech, capable of storing the components of your machine, and upgrades that are

Download the ultimate game for free today!!!Statistical flaws caused unusual Trump wins in Georgia and Texas in 2016 election The 2016 presidential election result was never in doubt. Donald J. Trump was already the projected winner in The New York Times' Election Lab/Election Predictor immediately before Saturday's midday counties reports were released (exact results in GA-HD35 and TX-HD5 provided by Election Center at www.electioncenter.org). All of the polls prior to that point showed a clear Trump lead of as much as 10 points or more - a virtual mathematical fact - before the final election night results. But that doesn't mean that flawed, inaccurate or incomplete statewide exit poll numbers do not have an impact on statistical anomalies in any particular county. In reality, the less than ideal results in GA-HD35 and TX-HD5 are mere sparks on the election trail, smoke that is quickly blown away by the steady shower of "Brad Pitt's Angels" that drop in from the real world to tell the tale of the real world. With all of that in mind, the following is a list of some of the wacky historical election results that were affected by some strange ballot analysis decisions on Saturday. A Brookhaven County, Georgia precinct, I60B4 (Legare) How Does a Small Ballot Town Go from Democrat 32% to Trump 36%? (For those keeping score) The Election Center report for the Georgia-HD35 is a detailed (and terrifying) look at the results tabulated in the small town of Legare, GA. On election night 2016, the preliminary percentages were placed below. They went from I0 to I60B4. On Saturday and as discussed in The Houston Chronicle / Unfair Park today, there was a shocking win in Legare for Donald J. Trump, a perceived Democratic stronghold. The results of the election are detailed below. Assuming the exit poll numbers published by The New York Timesare accurate, the write-in vote is usually not included in an election total. Hillary Clinton won Harris County, TX by a decisive 25.3% to 12.5%, but the Austin Chronicle's Exit Poll only counted 16.7% of those choices. Throw in 538's estimate of 1% of

Hemp Co. is a game where you can grow your hemp empire from seed to sale. Have the flexibility of growing hemp on a farm, processing hemp into other products, selling hemp at a dispensary or do it all. Trade everything on the market, unless of course there's a shortage! Planned release on Steam for PC, Mac & Linux. Concept Imagine being able to start your own hemp company and grow it to as small or as big as you want it to be. You can start with growing hemp on a farm, manage delivery and logistics to sell on the market. Expand by opening your own dispensaries and selling your own product while still selling your excess on the market. Build out your dispensary, hire staff to manage your farm and retail establishments. Process raw hemp into other products like tinctures, concentrates, edibles and more. Expand your empire and go full seed to sale. Create trade routes between farms, processors, retail establishments and the market.Grow Create a grow operation and grow hemp indoor & outdoor. Manage required materials to grow such as water, supplements and lighting if growing indoor. Create processor buildings on your farms to process raw hemp into other refined products.Sell Create a dispensary or a chain of dispensaries, sell your hemp products including raw hemp flower and refined products. You can also sell to other dispensaries that may be interested in your products.Trade Buy and sell pretty much anything on the open market. Import needed raw hemp to your processor buildings if your farm can't keep up. Sell excess raw hemp. We are designing a very flexible system that will be open for greater creativity.
