What's new:

23 Dec 2016 07:22:00 GMTFree Preview of IDC a Dragons: Of Fire and ice RPG of Fire and ice RPG that will be published as a downloadable product. **20 Dec 2016 19:21:00 GMT**Wish I'd thought of it first! I receive a new email from a user regarding a complaint about IDC: A Dragons: Of Fire and ice RPG that will be published as a downloadable product. Here is an excerpt: -The legendary continent and hostile political faction system are not sufficiently appealing. I don't want to buy or download a game with a "cult" faction system that I don't know what I'm doing and a high chance of getting in trouble. The communicator skill is already very boring. Interesting fun in skill combinations. The combat system is looking very boring. Also the combat system system is looking very disallowed that I know this is a game more for defenders than the attackers. And they will need to develop their characters to reach high levels. I don't want to spend a lot of time in leveling as a defender. The skill system is looking very boring. Unusual combination of skills just to replace skills and abilities? What the hell would happen. Also the combos or ability cards are very boring. I have been playing this game when it was still beta and in July without any problems. My opinion is that this is a bug. I have another theory that it could be something that could be corrected after the game is released. There are some complaints about lack of sufficient features and too restricting effects. And some other news from the said user: I'll just say that I will not purchase another game via Steam
